

Leksell Gamma Knife® PERFEXION™
“The Gold standard just went Platinum”

The Leksell Gamma Knife® PERFEXION™ represents the future of stereotactic radiosurgery. This innovative, fully robotic system radically broadens both the techniques and the scope of treatments. The The Leksell Gamma Knife® PERFEXION™ offers faster, more flexible surgical procedures, thereby enabling substantially more patients to be treated with less effort than ever before.

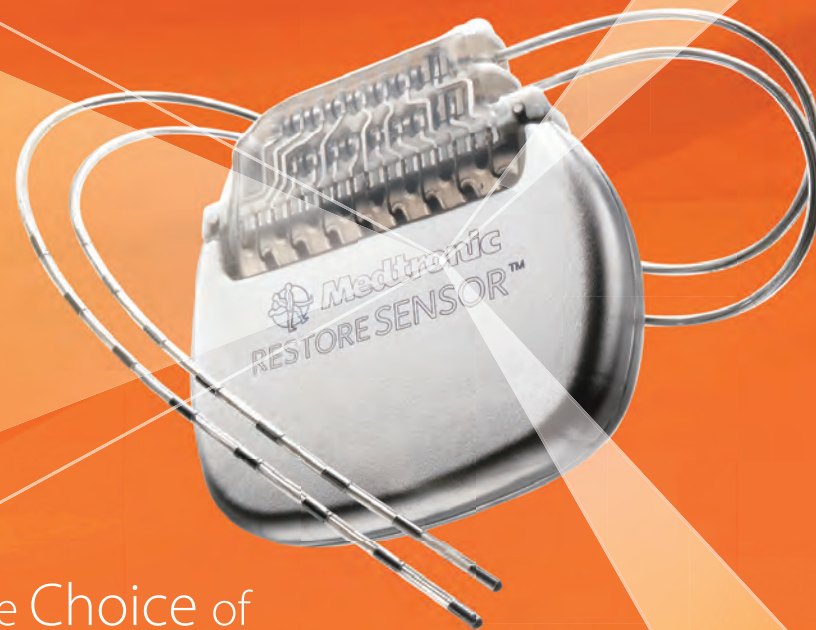

- Expanded treatment volume enables 20% more cases due to increased accessibility in the cranial region
- Saves an average of up to one hour per patient compared to other Gamma Knife® systems
- Radiation protection ten times better than other technologies
- Automatic collimator configuration occurs in seconds
- Unlimited dose sculpting using composite shots and dynamic shaping
- Prepared for neck and cervical spine treatments
- Equipped for remote diagnostics and service
- Leksell GammaPlan® PFX™ with PC platform enables remote planning, multi users and patient database access

AdaptiveStim™

EXCLUSIVELY AVAILABLE WITH RestoreSensor™

Automatically adjusts
stimulation to your
patient's optimal setting.

제19차 대한정위기능신경외과학회 학술대회

2013

2013

제19차

대한정위기능신경외과학회
학술대회

일시: 2013년 3월 30일(토) 08:00-18:00

장소: 부산 해운대백병원 대강당

주최: 대한정위기능신경외과학회
주관: 대한신경외과학연구재단

Leadership in DBS Innovation

1. Extended Battery Longevity

- No more "doubler" effect

2. Advanced Programming Platform

- Interleaving stimulation

- Programming groups

3. Stimulation mode selection

- Constant Voltage and Constant Current
